The Coherence Company

*Coordination Infrastructure
for the AI age*

consider

\$8.9 trillion lost annually to coordination failures.

(research)

70% of strategic initiatives dying mid-execution.

65% of ventures dissolving through founder conflict rather than market forces.

These aren't aberrations - they're symptoms of missing critical infrastructure.

We're building the missing layer

AI for collective sense making

*The bottleneck isn't
talent, funding or vision.
It's coordination capability.*

There are countless brilliant people worldwide - researchers, builders, creators, organizers - working in parallel on related problems, often duplicating effort, occasionally producing incompatible solutions.

How can AI enable greater arcs of sense-making and coordination?

For this, The Coherence Company is building infrastructure - tools and services to enable Coherence at scale.

Coherence Journey

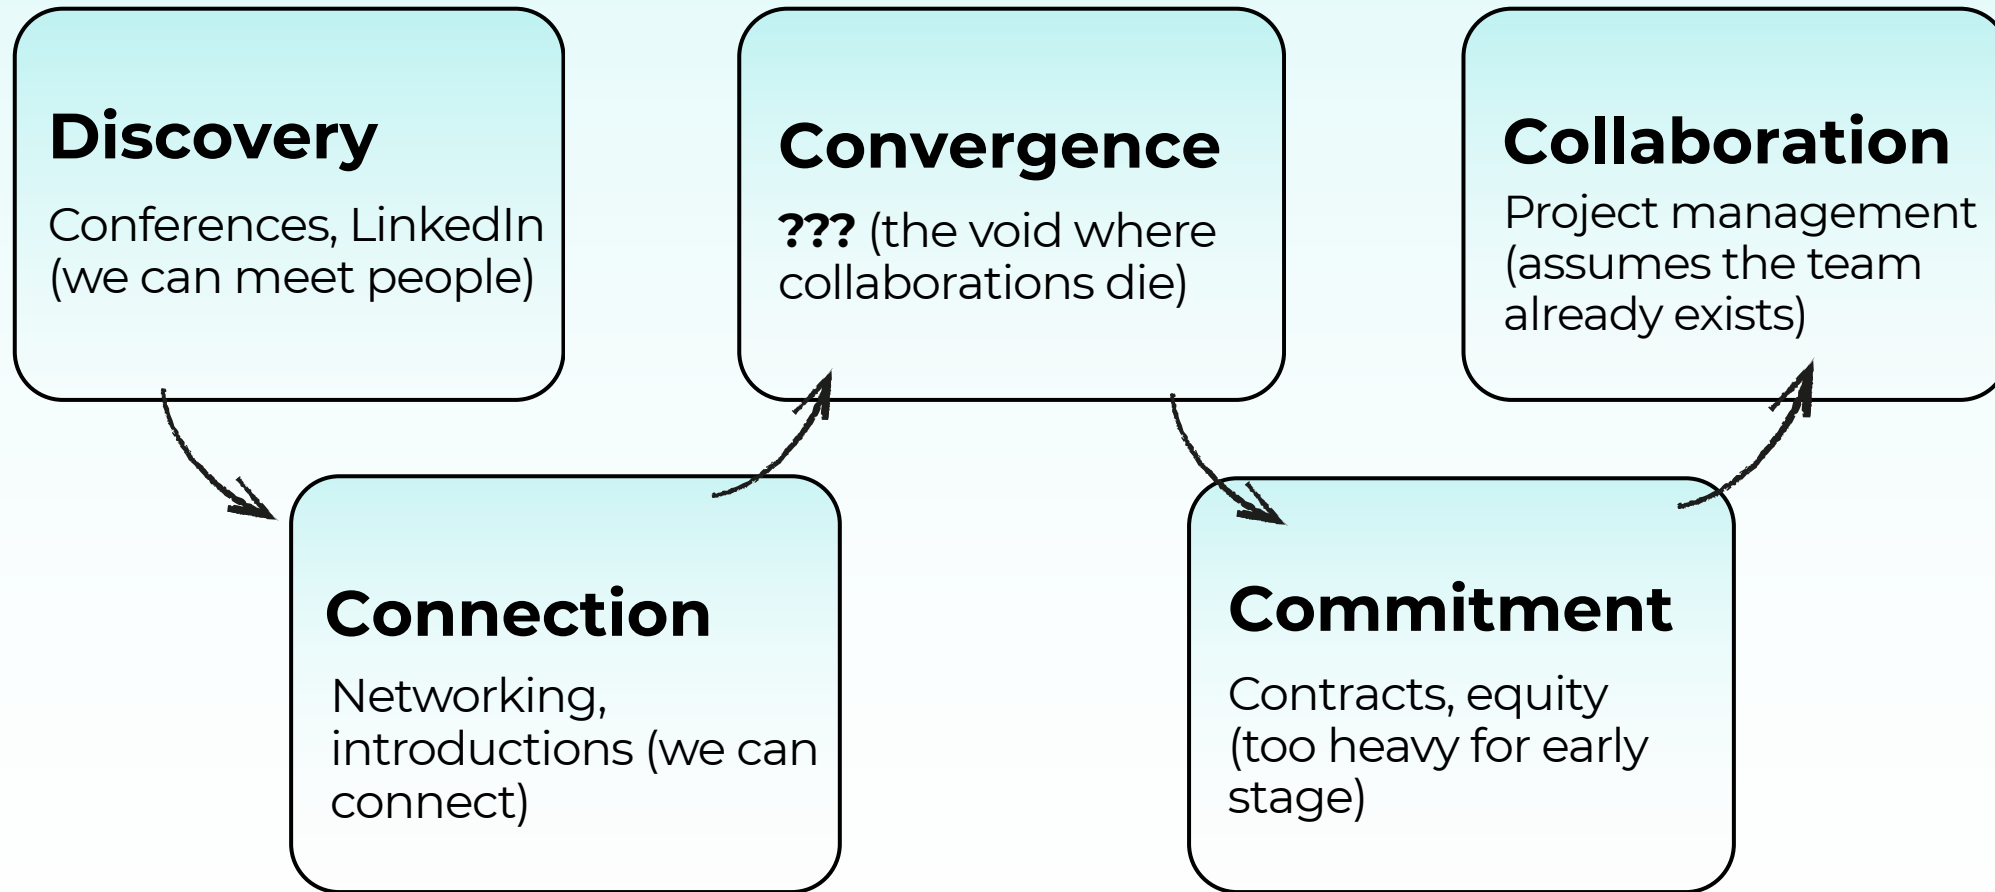

The Coherence Journey is a map for how groups move to connect for action - to build trust and emerge islands of coherent alignment making joining action possible.

We have been exploring this territory since 2016 evolving our understanding, running online and IRL events and experiments with teams, communities & movements.

Now we have synthesized our insights with research and learning in complexity science, organizational development and spiral dynamics.

Now we're ready to build.

The Coherence Journey: a path to Action

Purposeful, AI-powered, Human *a new kind of startup for our times*

We're forming a founding team through the process of Coherence itself.

Over 5 weeks, we'll discover whether we're meant to build this infrastructure together - through a methodology that demonstrates the very coordination capacities we're developing.

This is applied research in organizational emergence.

We're gathering people who want to work together to build a new kind of purposeful startup - AI powered, Teal, Turquoise and Regenerative. We invite:

- Systems architects
- Social researchers
- Complexity facilitators
- Technical builders
- Implementation pragmatists
- Designers & Creatives
- Conceptual translators
- Epistemological investigators
- Strategic pattern-matchers

The Coherence Company

desired capacities

We're particularly interested in people who maintain active practices across multiple domains - researchers who build, executives who teach, artists who organize, technologists who facilitate.

The Seeding Process

Session 1: You'll understand what TCC is building and why it matters. Meet others who care about this problem. Surface questions and uncertainties - not to have them all answered, but to see if this is a question you want to live with.

Session 2: We'll co-create the culture we want to build inside of. What values matter? How do we make decisions? How do we handle conflict? This isn't handed down - it's designed together.

Session 3: Let's get tactical: what needs to be built, who does what (preliminary), what the MVP looks like. You'll see where you might contribute.

Session 4: If you're still in, we formalize. Roles, agreements, commitments. Then we build.

The process itself is designed to be coherent - using Liberating Structures, Art of Hosting practices and the Coherence Journey map we're teaching others to use.
